PROFESSIONAL SUMMARY

Dedicated Computer Science Engineer specializing in Full-Stack Development, Machine Learning, and Computer Vision. Experienced in engineering AI-powered tools, scalable web applications, and end-to-end ML pipelines. Proven ability to translate complex research into practical, user-centric solutions with a strong commitment to clean code and operational efficiency.

EDUCATION

Barak Valley Engineering College, ASTU
B.Tech in Computer Science and Engineering

Sribhumi, Assam
Expected 2028

TECHNICAL SKILLS

Programming Languages: Python, SQL, HTML, CSS, JavaScript, Java
AI & Machine Learning: Deep Learning, Computer Vision, NLP, OSINT, Data Analytics
Frameworks & Tools: React, Node.js, Express, MongoDB, OpenCV, Figma (UI/UX), Vercel, Git

EXPERIENCE & INTERNSHIPS

Technology Innovation Hub (TIDF), IIT Guwahati
Summer Research Intern

Guwahati, Assam
June 2026 – July 2026

- Applied advanced Deep Learning and image processing techniques to solve complex forensic challenges.
- Collaborated closely with leading researchers to optimize neural network architectures for real-time analysis.

Emertxe Information Technologies

MERN Stack Intern

Online
Aug 2026 – Sep 2026

- Engineered **HomelyHub**, a full-stack property booking platform utilizing MongoDB, Express.js, React, and Node.js.
- Demonstrated practical implementation of RESTful APIs, state management, and responsive frontend design.

Directorate of Information Technology (DITEC), Govt. of Assam

Industrial Intern

Assam
Completed Aug 2026

- Engaged in practical implementation of tech-driven governance solutions and high-level data analytics.
- Developed data tracking metrics to assist in governmental decision-making processes and IT infrastructure.

PROJECTS

ClearSight | *Python, Computer Vision, Deep Learning*

IIT Guwahati

- Engineered an AI-powered computer vision forensics pipeline under TIDF to solve complex forensic challenges.
- Implemented advanced image processing algorithms to optimize real-time analysis for investigative workflows.

BioSync | *DeepFace, Neural Networks*

- Developed a full-stack biometric attendance system utilizing secure QR tokenization. **Source:** GitHub / BioSync-Biometric-Attendance
- Integrated DeepFace neural networks to achieve robust, real-time facial verification and secure authentication.

IntelliFilter | *Python, NLP, Machine Learning*

- Built an end-to-end NLP model to automatically detect and filter SMS/Email spam messages. **Source:** GitHub / IntelliFilter
- Deployed the trained classifier as a live machine learning micro-project for real-time text analysis.

Student Admission Portal | *Java, OOP*

- Engineered a Java desktop application utilizing OOP principles to streamline student enrollment.
Source: GitHub / STUDENT-ADMISSION-PORTAL
- Designed an intuitive GUI and integrated efficient data structures for reliable application record management.

Chessverse | *JavaScript, Web*

- Developed an interactive web-based chess application providing a seamless gameplay experience. **Source:** GitHub / BVEC_Chess

Additional Projects & Designs

- **UI/UX Prototyping:** Designed an interactive application interface. **Source:** Figma Workspace
- **Open Source:** Developed the **Assam Tourism Portal** and other technical projects, fully available on GitHub.

LEADERSHIP & EXTRACURRICULARS

- **Secretary, BVEC Chess Club:** Organize college-level tournaments, manage operations, and maintain a competitive FIDE profile.
- **Social Media Head, Swargam:** Manage official presence, coordinate music club activities, and lead design initiatives.
- **Graphic Designer, BVEC College Magazine:** Spearhead visual layout, digital aesthetics, and official design formatting.
